## PEOPLE'S EMERGENCY BRIEFING ■ LOCAL SCREENINGS ■

A 50-minute documentary on what's happening to our climate and environment - and what it means for our health, food systems, national security, economy and more - is being shown at several local venues. Each screening is followed by an open discussion. The film aims to spark a societal tipping point toward urgent action on climate and nature by enabling communities nationwide to host screenings and invite their MPs and other policymakers to discuss the issues raised.

These are **FREE** events, with donations gratefully received.
